

VEGETABLE SHARE
JUNE - OCTOBER
21 WEEKS
OF SEASONAL
VEGETABLES

Our Farm practices:

We are a small family farm growing on approximately 8 acres. Our farm is certified organic and committed to growing, clean high quality, produce. We do not use pesticides, herbicides, or fungicides on our farm. We maintain quality by improving soil health and using row covers and beneficial insects to reduce pest damage and disease.

What is a CSA?

It stands for **Community Supported Agriculture** and is an agreement between customer and farmer. By purchasing a “CSA Share” up front allows us, the farmers, to focus on growing vegetables and in return you, the customer, receives weekly seasonal vegetables grown, harvested, washed and packed just for you.

Benefits of Membership in a CSA

- Purchase directly from a small local organic farm
 - supporting local agriculture
- Vegetables harvested fresh and delivered to you
 - grown on our farm by us
- Eat more home cooked meals = eating healthier
 - recipes and cooking tips
